

REAKTOR RESIDENCY CENTRE

at Creative and Cultural Centre Nová Cvernovka, Bratislava

Inclusive residency program offering 2-months research and creative residencies in cooperation with other local and international residency programs and individual exchange activities. It takes place in developing Creative and cultural centre of Nová Cvernovka (est. 2016), in Bratislava, Slovakia.

Mission

Our goal is set to enhance the creative potential of our activities both by establishing new partnerships with creative centers across Europe and by inviting creative individuals from all over the world to join us and share their ideas and experience. The residency program is designed as an opportunity for art world professionals - curators, cultural operators, visual artists as well as performance or literary artists, together with philosophers, theoreticians, sociologist and other social scientists. Their residency projects should lead to establishing a close contact with Slovak art scene and support our cultural centre in its development stage.

Vision

Our residency program launched in 2018 with research residencies for experts and theorists and creative residencies for artists and performers to look into various problems and topics related to the cultural centre itself (e.g. gentrification, deindustrialization, demographic shifts, ecologic sustainability etc).

Inclusiveness

Our residency centre is also designed to welcome people usually unwittingly excluded from majority of residency programs:

- parents / families with children
- middle-aged and elderly persons
- disabled persons

Premises and capacity

Currently we offer 4 residency apartments (25m and 29m) and 1 studio (25m). Our residency program is able to operate up to 4 residencies at the same time in a two-months period (which means we can possibly accommodate up to 24 residents per year).

- residency studio (25m)
- residency guide (helping getting in touch with local art scene, suggesting itinerary, helping with a basic orientation in the town)
